

PRODUCT CHANGE NOTICE (Amendment)

Dear Valued Lantronix Customer,

This is an amendment to PCN-376 (released on May 6, 2016), which announced the availability of the XPress DR+ Standard Tunneling Firmware version 6.11.0.2. This amendment is to inform you of the following items that should have been included in the original PCN:

- The product agency label was updated (C-Tick logo replaced by RCM logo).
- The **XPress DR+ Modbus Firmware version 3.4.0.1** has been released and available for download from our website, <http://www.lantronix.com/support/downloads.html>.

Original Announcement (PCN: 376)

The purpose of this communication is to inform you of an upcoming change to the XPress DR+ Industrial Device Server. This change is part of our effort and commitment to continuous improvement of our products and processes.

Change Type

Software

Product Affected

Part Number	Description	Old Revision	New Revision
XSDR22000-01	XPress DR+ 2-Port Industrial Device Server, RoHS	C18	D19

Lantronix is pleased to announce the release of new XPress DR+ Application Firmware version 6.11.0.2. This new **firmware** inherits several feature enhancements and bug fixes implemented across Lantronix Cobos OS-based products.

Description and Extent of Change

This new firmware offers several new features and improvements including:

- Support for datagram type 18 for DNS feature
- Advanced password support in Web GUI
- RFC793 support related to ACK Timeout transmission
- Implement new monitor mode command to show full firmware release version
- Numerous bug fixes

Refer to the firmware Release Notes for further details.

For customers that would like to take advantage of the new capabilities of FW v6.11.0.2, the new firmware and associated release notes will be available for download from our website by May 13, 2016.
